

Welcome

Charisma Home Healthcare, Inc. - we make things easier for you at home! We have a mission to preserve the high level of quality in providing home health services. To do this, we gather the state's most respected nurses, therapists and home health aides, forming the care team of our company. In the many years of service, their experience and dedication helped Charisma Home Healthcare, Inc. grow by bringing comfort and expert care to customers' homes.

While the state has set standards for home health agencies to follow, **Charisma Home Healthcare, Inc.** chooses differently. We choose to go above and beyond what the state expects from our company. We take "going the extra mile" very seriously and this level of seriousness has earned us the wonderful reputation we hold today. It is evident that our clients are happy about the services we bring them and we take pride in their favorable reviews.

We remain flexible with our schedules and care plans in order to accommodate specific care requirements as dictated by patients' health and as prescribed by their physicians. With home health care services designed especially for each client, you can expect **Charisma Home Healthcare, Inc.** to meet your expectations - and then some. Families, patients and physicians can trust our agency to only provide care providers who have the experience, the education and the heart to give patients the care they need at home.

Being an alternative to nursing homes and lengthy hospital confinement, we understand the level of responsibility we have to fulfill. We also realize how much trust you put on our staff. We take care of that trust. After all, we want to make things easier for you at home. Trust in our experts at **Charisma Home Healthcare, Inc.**

About Us

To bring you better health, we focus on three principles:

We bring you satisfaction.

Our goal is your total satisfaction. With us, you can expect to receive treatment like you are our own family. From the beginning, our objective is to give you the first-rate home health care services you expect from our staff. In the process of providing care, we regularly review our performance to ensure that we continually meet your care requirements at home.

We keep our services flexible.

We take care of different individuals and with different sets of needs. Our patients range from individuals going through recovery, post-surgery, old age and disability. Because their care requirements vary greatly, we find ways to remain flexible. Clients go through a needs assessment and are designed a plan of care which guides our nurses, therapists and home health aides who will be assigned to their case. Our staff has been trained to be observant of changes in the client's health so we can make changes to their care plan or schedule or services in order to achieve the level of health that is ideal for their condition(s) and/or age.

We listen to you.

We listen and take in your feedback. However, **Charisma Home Healthcare, Inc.** doesn't stop there. We also listen to family members. We know that in achieving optimal health for a patient in your home, we need collective effort from everyone in the household, the patient, the physician and the assigned care provider.
